PERSONAL SUMMARY

A dedicated Computer Science undergraduate with a solid foundation in programming, data structures, and problem-solving. Possesses hands-on experience with object-oriented concepts and analytical thinking developed through academic coursework and practical learning. Comfortable working with modern development tools and technologies, with a strong interest in continuous skill development and real-world application of computer science principles. I'm looking for a chance to grow professionally and contribute effectively in a learning-focused environment.

EDUCATION

Bachelor of Science (Computer Science) University of Sindh, Jamshoro	Jan 2022 - Dec 2025
Intermediate Ghazali Model H/S School & College Ghotki	June 2020
Matric Ghazali Model H/S School & College Ghotki	June 2018

ACADEMICS PROJECTS

- Java-based academic projects using OOP principles
- Implemented DSA concepts (stacks, queues, linked lists) for efficient processing
- Machine learning model for student performance prediction
- **Final Year Project:** Alumni Management System with authentication, profiling, and job modules

PROFESSIONAL CERTIFICATIONS

Coursera Google Certificates

- [Google Prompt Engineering Essentials](#)
- [Google AI Essentials](#)
- [Prompt Design for Work Tasks](#)
- [Speed up Data Analysis and Presentation Building](#)
- [Maximize Productivity with AI Tools](#)
- [Discover the Art of Prompting](#)

SKILLS

Languages and Concepts

C++: Strong foundation in C++ programming with core concepts and Object-Oriented Programming.

Java: Familiar with Java programming and object-oriented design principles.

Python: Skilled in Python for scripting and basic data analysis tasks.

Kotlin: Basic knowledge of Kotlin for Android/mobile application development.

Object-Oriented Programming (OOP): Good understanding of OOP concepts, including classes, inheritance, polymorphism, and encapsulation.

Data Structures & Algorithms (DSA): Familiar with fundamental data structures and algorithms for problem-solving.
